Some people claim that school should focus more on science other than art education. This statement seems reasonable, for example, the primary school began to teach the science class for the children at the age about seven. However, in my opinion, I disagree with this statement for the following reasons.

Some people claim that schools should focus more on science other than art education. This statement seems reasonable.For example, ~~the~~ primary schools begin to teach ~~the~~ science classes for ~~the~~ children at the age about seven.例子不具体，问题很严重 However, in my opinion, I disagree with this statement for the following reasons. 本段话最大的语言问题是名词不知道何时加复数，何时加冠词。

Admittedly, it is true that school put more attention on the science indeed can develop the intelligence of children. Through the science class, such as math, physical or biology, student can exercise their ability of calculation and imagination. But some science are too hard for the students to understand, thus can make them feel frustrated. For example, My little cousin who learned math at a very young age, five-year old perhaps, didn't want to learn math any more at high school because math is so much difficult to understand in his mind even though he have attend many competitions in his child and got much honor corresponding to math.

Admittedly, it is true~~ture~~ that ~~school~~s put~~ting~~ 这里需要动词作定语 more attention ~~to on the~~ science indeed can develop ~~the~~ intelligence of children. Through ~~the~~ science classes, such as math, physicsa or biology, students can exercise their ability of calculation and imagination. But some science subjects are too hard for ~~the kids~~students to understand, and thus can make them feel frustrated. For example, My little cousin who learned math at a very young age, five-year old perhaps, didn't want to learn math any more at high school because math was~~is~~ so much difficult to understand in his mind even though he had~~ve~~ attended many competitions in his childhood and got many~~much~~ honors corresponding to math.这段话论述还不错，但是除了首句之外其余三句有没有提到 school 这个全文主题词，于是仅仅就 science 的好坏来论述，时间长了会有跑题的嫌疑。你看到这句评语如果不理解，可以微信问我。另外，语言问题太大了。
